

Connecting to wireless

for visitors

The University of Sussex uses the "eduroam" network which is an international standard for education. If you already have an eduroam login, it should work at Sussex too, but if not, follow these instructions to use a temporary username and password

Please note - you will need to change settings on your laptop or device for which you will need administration privileges and the latest service patches for Windows computers.

1. Before you start

You will need your login details:

username BLOODYMINDED@conf.sussex.ac.uk

password E3bY5PE5

(valid Mon 8 October 2018 to Mon 15 October 2018)

2. Register your device with Sussex

(You only need to do this the first time you connect)

Start by connecting to the wi-fi network called **sussex.ac.uk-wifi-setup**

- Open a browser which should automatically take you to the Sussex registration page (this can take a little while so wait for a minute if it doesn't appear immediately)
- Select the type of device you are using
- Follow the on-screen instructions.

3. Next time you connect

You only have to follow the set-up process once so next time you connect:

- Select the wi-fi network "eduroam" (the wireless network used at Sussex)
- If you are asked for your username and password, make sure you enter the username shown above (including the "@conf.sussex.ac.uk") along with the password
